INTEGRATED QUALITY, ENVIRONMENT AND SUSTAINABILITY POLICY

INTEGRATED POLICY QUALITY, ENVIRONMENT AND SUSTAINABILITY

The fundamental objective of this policy is the continuous improvement in the execution of the activity conducted by **Ismael Quesada** in the marketing of chemical products.

COMMITMENT

The Management of ISMAEL QUESADA is committed to guaranteeing customer satisfaction, controlling the quality of its services, protecting the environment and applying sustainability principles, considering our context and the different stakeholders, as well as their expectations towards us.

The permanent objective of this policy is to support our strategic direction in economic efficiency, prevent environmental pollution and maximize the social impact of the company. To this end, the Management undertakes to disseminate, keep up to date and extend this policy to the people and companies that carry out work for this organization, as well as to implement control and monitoring methods that allow their economic, social and environmental performance to be evaluated, their processes to be improved and dialogue with stakeholders to be improved.

For this reason, the Management assumes the following commitments and objectives:

ENVIRONMENT:

To provide the possible technical and economic means to improve environmental aspects that may have a negative impact on the environment because of our context and activities.

- To promote the reduction of electricity consumption in the performance of our activities, to control the waste generated and to encourage the reuse of all those that due to their characteristics allow it.
- Comply with the applicable legislation and other requirements that the Management assumes, with a view to pollution protection and continuous improvement.
- To provide environmental training that allows setting objectives for improvement, control of significant environmental aspects.
- Environmental protection, with the direct participation of activities such as the cleaning of protected areas and controlled plantations.

INTEGRATED POLICY

QUALITY, ENVIRONMENT AND SUSTAINABILITY

QUALITY

To associate quality with our activity, establishing control requirements in our processes.

- Establish appropriate objectives and goals to increase our competitiveness and customer satisfaction.
- Define responsibilities and authorities, which allow control of established procedures, increase productivity and cost reduction.
- To facilitate the training of personnel, promoting their involvement in quality control and knowledge of their activities.
- Monitoring and analysis of control processes and activities, to apply continuous improvement.

SUSTAINABILITY:

Ismael Quesada is committed to respecting human and labor rights, assuming this sustainability policy, making it known and ensuring that it is respected by all the people in the organization.

- Code of ethics. The organization will adjust its actions to the company's own ethical principles and values and will act with transparency towards its stakeholders. It will defend decent work and with value to the company and people.
- Fight against corruption. The people who are part of the company will ensure respect for the anti-corruption policy in force.
- Reputation. The people in the organization will maintain integrity and honesty, to avoid damaging the company's reputation.

METHODOLOGICAL REFERENCES:

Compliance with these principles is guaranteed through the implementation and maintenance of an Environmental and Quality Management System based on the requirements of the ISO-14001:2015 and ISO-9001:2015 Standards and the Sustainability Plan conceived in accordance with the principles of the ISO 26000 Guide.

Policy approved by the board of directors in **May 2026**.
